RUBBER GLOVES

GLATEX/35

## Description

Dromex® rubber gloves with yellow, natural rubber fully coated gauntlet with a crinkle hand finish. The Glatex-35 has a reinforced fleeced jersey cotton liner. Designed for high durability and grip.

Especially designed for the heavy machinery and multiple protection for any heavy industry, this is the ideal safety glove for numerous industries as heavy machinery, mining, oil and gas, automotive, assembling, packaging, warehousing both indoor and outdoor.

## Special Instructions

Although the manufacturer has examined these gloves under the system for ensuring quality of production by means of monitoring and inspection, we recommend that all gloves should be thoroughly inspected before use to ensure no damage is present.

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer. The gloves and information contained herein are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment. Actual conditions of use cannot be directly simulated in a test environment, therefore it is the responsibility of the user and not the manufacturer or supplier to determine the suitability for intended use.

## Compliance & Conformity

Tested in accordance with the European directive for PPE (89/686/EEC) for complex design and is compliant with EN 420 for innocuousness, EN 388 for Mechanical Risks.

## Specifications

Style: Fully coated natural rubber gauntlet  
 Liner: Fleeced Jersey cotton liner  
 Back: Crinkle finish  
 Palm: Crinkle finish  
 Cuff: Fully coated natural rubber  
 Mass: ±256g Per pair (size 9.5)

## Packaging, Storage & Obsolescence

GLATEX/35 - Packed in set of 12 per packet at 72 pairs per carton for shipping. Store in a cool, dry place. Stored correctly, the gloves physical properties will not change for up to five years.

## Cleaning & Maintenance

Gloves should not be left in contaminated condition if re-use is intended especially if potential hazards exist. Before removal from the hands excess contaminant should first be removed however, should this not be possible, it is advisable to ease left and right hand gloves off using the gloved hand and remove the gloves without the contaminant contacting the bare hands. The gloves may then be decontaminated with mild detergent solution, then rinsed with clean water and dried ideally with some air-movement.

## Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Gloves should be disposed of considering the hazardous substances they were used for. Please consider recycling.

## Sizes Available

Code	Size	Palm Length
GLATEX/35	L/10	125mm (±5mm)

\* As per the EN420 standard, actual measurement of gloves are determined by the manufacturer, taking into account the behaviour of the glove material, its thickness (such as leather gloves, PVC gloves etc), elasticity and the intended use.

\* Sizing charts only serve as a guide. Sizes and measurements are for reference only. In order to make an informed decision, always try on the gloves as each glove features a unique construction to accommodate a wearer's preferences.

## Measurement Guide

## Materials

1. Wing thumb
2. Fingers, palm & back with crinkle finish
3. Fully coated natural rubber cuff
