

Dromex

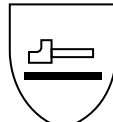

CUT5 NITRILE COATED GLOVE

#57

EN 388:2016

+A1:2018

4X43C

Description

Dromex® 100% CUT5 gloves consists of a 100% Dromex® Cut5 outer liner, reinforcing the HCT (Hybrid coating technology) multilayer nitrile coating that provides protection against cut, abrasion, tear and puncture hazards. These gloves are suitable for use in industries such as automotive, assembling, steel and glass sheet handling, mining, construction work, chemical handling and oil and gas.

The #57 gloves feature a reinforced thumb and index finger whilst the HCT nitrile coating on the palm gives excellent oil resistance performance.

Special Instructions

Although the manufacturer has examined these gloves under the system for ensuring quality of production by means of monitoring and inspection, we recommend that all gloves should be thoroughly inspected before use to ensure no damage is present.

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer. The gloves and information contained herein are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment. Actual conditions of use cannot be directly simulated in a test environment, therefore it is the responsibility of the user and not the manufacturer or supplier to determine the suitability for intended use.

Compliance & Conformity

Complies with the requirements of CE type examinations, approved to EN ISO 21420:2020 for innocuousness, EN 388:2003 (4,5,4,2)* previous standard and EN 388:2016 + A1:2018, (4,X,4,3,C)** revised standard for compliance with regulation (EU) 2016/425 for Mechanical Risks.

Quality System conforms to ISO 9001:2015. *Dromex #57, EN 388:2003 is rated at a cut 5 level performance **Dromex #57, EN 388:2016 is rated at a cut level C performance due to the change of method in cut resistance testing methods.

Specifications

Style: Wing thumb, palm dipped glove
Liner: 100% Dromex® Cut5 fibre
Palm: HCT (Hybrid coating technology) multilayer
Nitrile coating 1.2mm ± 5 %
Back: 100% Dromex® Cut5 1mm ± 5 %
Cuff: 100% Dromex® Cut5
Mass: ± 99g per glove (size 11)

Packaging, Storage & Obsolescence

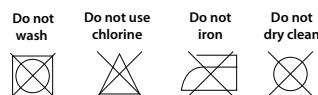

Packed 12 pairs per bundle and 120 pairs per carton for shipping. Store in a cool, dry place. Stored correctly, the gloves physical properties will not change for up to three years.

Cleaning & Maintenance

Gloves should not be left in a contaminated condition if re-use is intended especially if potential hazards exist. Before removal from the hands excess contaminant should first be removed from the glove. Should this not be possible, it is advisable to ease left and right hand gloves off using the gloved hand and remove the gloves without the contaminant contacting the bare hands.

The gloves may then be decontaminated as indicated below:

Dromex® #57 gloves are not suitable for dry cleaning as well as laundering. We recommend that no bleaching or oxidising ingredients or any fabric softeners be used.

Do not immerse in water.

Wipe dirty and stained gloves with a clean damp cloth and allow to air dry. Store the gloves in the original packaging in a cool dry place and out of direct sunlight and UV light.

There is no remarkable impact on cut resistance during the normal life cycle of a glove. Depending on glove construction, staining and cleaning method, the differences in shrinkage, yarn strength and colour may occur. In order to maximise the glove life-cycle, we recommend the mildest possible cleaning conditions in terms of temperature, chemicals and cycle duration.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Gloves should be disposed of considering the hazardous substance they were used for. Please consider recycling.

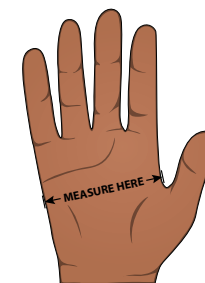

Sizes Available

Code	Size	Palm Length	Cuff Colour
#57-7	XS/S	85mm (±2mm)	Red
#57-8	S/M	90mm (±2mm)	Yellow
#57-9	M/L	95mm (±2mm)	Brown
#57-10	L/XL	100mm (±2mm)	Black
#57-11	XL/XXL	105mm (±2mm)	Blue
#57-12	XXL/XXXL	110mm (±2mm)	Green

* As per the EN420 standard, actual measurement of gloves are determined by the manufacturer, taking into account the behaviour of the glove material, its thickness (such as leather gloves, PVC gloves etc), elasticity and the intended use.

* Sizing charts only serve as a guide. Sizes and measurements are for reference only. In order to make an informed decision, always try on the gloves as each glove features a unique construction to accommodate a wearer's preferences.

Measurement Guide

Materials

1. Reinforced thumb & fingers
2. Nitrile coated palm & fingers
3. Winged thumb
4. Knitted wrist
